

"Landscapes: Textural Effects with Acrylics and Mixed Media with Metka"

Saturday & Sunday 23rd and 24th July 2022

CREATIVE EXPRESSIONS:

This is a fun filled and intuitive workshop where we will be exploring the wider dimensions of acrylics and compatible mixed media such as inks, pastels and collage.

Through the exploration and challenge of combining acrylics and other media, I will endeavour, with demonstrations, to lead you to a freer, creative visual expression.

We will also discuss the theory of colour.

The subject matter will flexibly revolve around simple Landscapes.

Because of the drying process, several pieces will be worked on simultaneously.

I encourage you to bring some reference material in the form of sketches or photographs which will be used only as a starting point.

Painting is the moment. The reward is doing it and watching the marvellous things that happen when the pigment hits the canvas.

"The magic begins!"
